

IHS Fairplay World Shipping Encyclopedia

IHS Fairplay World Shipping Encyclopedia provides comprehensive, quarterly updated information via DVD concerning ships of 100 GT and above. Subscribers also receive extensive data on marine-related companies and ports so they can construct a complete marine information system. Extensive query and report functions, as well as the ability to export up to 2,500 records covering 12 data fields makes this reference essential for any professional needing detailed data on this ship category.

Key data and features include:

- Details of over 116,000 vessels (100 GT and above)
- Includes ships on-order and under construction
- Over 124,000 marine-related companies
- Over 10,000 ports and terminals
- Maritime atlas with port plans, mooring diagrams and photographs
- Export facility
- Distance tables
- Quarterly updates
- Photofinder link
